Technical Note:

The publication of the Weekly Retail Price Movement of Selected Staple Goods in Provincial Capitals in Indonesia, July–December 2024, presents the retail price of selected staple goods obtained from the monthly Consumer Price Survey in 150 regencies/municipalities (38 provincial capitals and 112 other regencies/municipalities) as the center of economic activities in Indonesia. The Consumer Price Survey in 2024 includes the addition of 60 regencies based on the Household Expenditure Survey 2022 as well as new autonomous provinces, and implementing a new reference year (2022=100).

The data presented in this publication is the average price of several most consumed goods specifications in each regency/municipality. The significant price differences between regencies/municipalities on the tables are due to the differences in the specification of goods between regencies/municipalities.
